

Tree by nikluk, April 2020

Do not complicate stuff.  
It makes understanding and learning harder.

Language

Idea complexity

Contradiction

Put in Effort

Choice of words

Chose simpel words when possible. Do not try to sound fancy - it will only add to confusion, not clarity. The goal should be to be as clear as possible and avoid confusion.

Sentence structure

Keep the sentences easy to understand.

Metaphors

Metaphors are ambiguous. Being ambiguous is the opposite of being clear. Do not use metaphors.

Do not add extra layers of ideas if not absolutely needed.

Note to self: This needs more work.

Does what you say contradict something else you hold to be true? If yes, check your premises - at least one of them is wrong.

Put in effort into making stuff simple and easy to understand by checking for the things in the other nodes of this tree.
