Covid Shutdown & Liberalism

Based on discussion w/ curi & ingracke

<http://curi.us/2307-coronavirus-solution>

OBJECTIVE:

Avoid Hospital Overload
& avoid conflict w/ liberalism

Ppl do isolation voluntarily.

No Hospital Overload (probably).

No conflict with liberalism.

Ppl do not do isolation voluntarily.

Isolation by law (force).

No Hospital Overload (probably).

Ppl lose savings / work / house -->
worst life through force.

Conflicts with liberalism. If other
option possible, try to find one.
(BaU with precaution is a possible
option.)

Might be only option if situation
has gone too far.

Some ppl do “business as
usual” (BaU).

Ppl doing BaU take adequate
precautionary actions to minimise
spread of virus.

No Hospital Overload (probably).

Similar mechanism as successful
herd immunity (virus not enough of
hosts to spread effectively).

**Best alternative = no Hospital
Overload (probably) & compatible
with liberalism.**

Might not be possible if situation
has gone too far. If gone too far
isolation by law might be needed.

Ppl do not take precautionary
actions.

Hospital Overload.

Too many hosts available.

Most ppl do “business as
usual” (BaU).

Hospital Overload.

Too many hosts available even if a
few do BaU w/ precautionary
actions.
